rules, they are nonetheless deeply concerned with moral questions. Using contemporary \textit{folklore} and \textit{fiction} as the basis of their work, Barthes and Gass not only makes readers aware of the complexity of ethical issues but also argues that the premise for good ethical behavior is to have the right curiosity, the \textit{ethos}, and \textit{epistemology} to recognize the ambiguities of life. Retrospectively, these findings can also be applied to other modern writers to reveal the hidden ethical dimensions of their \textit{fiction}.

The Record of Linji Thomas Kiu-chi Krenchner 2008-10-31 The \textit{Record of Linji} is a classic text of Chinese \textit{Zhuism} and has been a key element of postmodern French Buddhist thought. The book includes a comprehensive study of the Sayings of the First Zen Master Linji Yixuan (d. 866), who is also known as the founder of the Lingji school of Chinese \textit{Zhuism}.

Foucault, by Paul Allen Miller 2007 Present-day ethical and literary phenomena have been deeply influenced by the works of Michel Foucault, by Paul Allen Miller, argues that a key element of present-day French intellectual life has been the reception of Plato. Until very recently, the concerns of academic philosophy and phylosophy have had little in common. On the one hand, this is due to analytic philosophy’s self-centering and its claim to be the only way of doing philosophy, and on the other hand, a certain sense of detachment from the practice of philosophy and science. As such, it has had little to say about the relation between contemporary and \textit{postmodern} \textit{modes of thought}.

The Troubles With Postmodernism Stefan Morawski 2013 The postmodern era has been characterized by a rejection of the traditional \textit{fictions} of \textit{truth} and \textit{knowledge}, and a privileging of \textit{sentiment} and \textit{subjectivity} as \textit{fundamental} aspects of human experience. This has led to a mapping of \textit{philosophical} \textit{thought} to a way of \textit{knowing} and \textit{understanding}. This is not to say that postmodern French thought has been a complete rejection of the idea of \textit{truth} and \textit{knowledge}; it has been that postmodern French thought has largely been the province of scholars of \textit{philosophical} \textit{thought} not \textit{fictions}.

The Trouble With Postmodernism Stefan Morawski 2013 This volume proposes a move away from the frameworks of the \textit{postmodern} perspective and its \textit{philosophical} thought. It is widely accepted that moral education is quintessential to facilitating and maintaining prosocial attitudes. What moral education should entail and how it can be achieved is an open question. Making Space for Knowing Ilana Maymind 2020-06-23 In \textit{Exile and Otherness: The Ethics of Violence}, the authors show that \textit{Plato's} arguably the world's first \textit{transnational} religion is a rich resource for navigating today's interconnected world.

Local Natures, Global Responsibilities Ilana Maymind 2010-01-01 In the New Literatures in English, nature has long been a paramount issue: the environmental devastation caused by colonialism has left its legacy, with particularly disastrous consequences for the most vulnerable parts of the world. At the same time, social and cultural transformations have altered representations of nature in postcolonial cultures and literatures. This volume explores the complexities of nature and cultural representations of nature in a wide range of \textit{materials}.
religious diversity turns to a new and urgent issue facing the community of world religions. For Paul Knitter, the spectre of environmental and social injustice looms over any serious discussion of humankind’s future. As urgent as it is to have peace among the world’s believers to achieve peace among nations, it is urgent that these communities unite in understanding and defending of the earth. In One Earth Many Religions Knitter looks back at his own “dialogical odyssey” and forward to the way that interfaith encounters and dialogue must focus attention on new challenges. Nothing less than enlisting the commitment of the world’s religions on the task of saving our common home will do. In making that case, Knitter makes clear the complex structures—political, economic, and social as well as religious—that face those who approach this task. While articulating a “this-worldly soteriology” necessary to overcome our eco-human plight, Knitter offers practical considerations on actions and projects that have and should have been undertaken to stem the tide of environmental and human suffering. The global crisis is both at the center of One Earth Many Religions and a test case for Knitter and others engaged in the dialogue of religions. Can religious differences concerning the nature of the transcendent themselves be transcended in order to promote eco-human well-being? The issue seems basic and clear if interreligious dialogue cannot effect such a change, then one must question whether religion is of any use whatsoever.
