What’s happening @ SGS STEAM Camp 2016?

**Electronic Sculptures**
With Casi in the Cascade Room

Learn about electricity and circuits by building, testing, and customizing electronic sculptures and wearable pieces of art!

**Marble Madness**
With Shannon in the Lab

Work with a group to build a functioning kinetic marble device using an oddball assortment of materials – and power tools!

**Fashion Forensics**
With Carly in the Olympic Room

Explore the chemistry of color as you solve a forensic puzzle and create a funky piece of colorful clothing using your scientific skills!

When you’re not in official classes, you can continue to tinker on your own if you’d like. There are toys and tools available in the Tinkering Zone for you and your newfound friends to play with.
